Art Unit: 3611

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 2 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 2, the term “practically” is vague and indefinite.

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claim 1 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by Yamada '581.

See fig. 1.

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Yamada '581 in view of Nakajima and further in view of Shirata.

As set forth above, Yamada teaches substantially all that is claimed.

Although vehicle frames commonly include various cross members, Yamada does not specifically show any. Nakajima, however discloses a vehicle frame including various cross members (e.g. 51, 52). Nakajima also teaches mounting the canister 41 “forward or rearward” of

Art Unit: 3611

the cross members as claimed. It would have been obvious to modify Yamada by including cross members, as taught by Nakajima, to provide a rigid frame. It would have also been obvious to mount the canister forward or rearward of the frame, as taught by Nakajima, to protect the canister.

Also, it is unclear whether the canister 6 (of Yamada) is higher than the fuel tank. Shirata, however, teaches that it is desirable to arrange the canister higher than the fuel tank (col. 3, lines 15 and 16). It would have been obvious to arrange the canister higher than the fuel tank, as taught by Shirata, to protect the canister.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Daniel G. DePumpo whose telephone number is 703 308-1113. The examiner can normally be reached on Monday - Thursday.
